🧑‍💻 Profile

I'm a self-taught **Node.js** developer with full-stack experience. I've built REST APIs, worked with both SQL and NoSQL databases, and integrated third-party services. I enjoy learning new things, exploring AI and automation, and building simple, useful tools with clean code.

🧪 Projects

📌 FinBot AI – *Financial helper*

- Built with Node.js, Telegraf, and PostgreSQL
- Integrated Google Speech-to-Text API for voice input
- Added auto-categorization logic and multilingual support
- Dockerized and follows clean service-based architecture

📌 Cyber Sentinel – *Threat intelligence system*

- Developed a cyber threat monitoring platform using Node.js and Express
- Collected and analyzed OSINT data from sources like VirusTotal and PhishTank
- Implemented GraphQL API and secured access with JWT
- Stored and managed threat profiles using MongoDB

🛠️ Technical Skills

Languages: JavaScript, TypeScript, SQL
Frameworks/Libraries: Node.js, Express, NestJS (learning), React, HTML, CSS, Bootstrap
Databases: PostgreSQL, MongoDB
Tools: Git, Postman, Visual Studio Code, Linux (Ubuntu), Windows
Other: REST APIs, GraphQL, MVC, SPA, JWT, OAuth2

🌍 Languages

- English – Conversational (IELTS 6.5)
- Russian – d
- Uzbek – Native
