PROFESSIONAL EXPERIENCE

AI Agentic Developer — UzVIP agency

Dates: October 2025 – Present (5 months)

- Developed Agentic systems using n8n, python, node.js and React.
- Worked with 5 different clients and successfully completed the projects.
- Built various Automations with n8n, Slack, ClickUp, Airtable, most Google tools, Dialpad, LLMs.
- **Tech Stack:** [n8n, Node.js, React, TypeScript, Postgres, Supabase etc.]

Freelance Backend Developer

Dates: July 2024 – Present (1.5 year)

- Developed backend solutions for small-scale projects, primarily using Node.js, Express, PostgreSQL, and MongoDB.
- Collaborated with coworkers and other developers to deliver functional prototypes and production-ready APIs.
- Strengthened problem-solving, adaptability, independent research and self-studying skills while working in varied tech stacks and JXU IT department.

Military University - JXU — IT Department

Dates: October 2022 – October 2025 (3 years)

- Provided technical support and maintenance for both software and hardware systems.
- Enhanced problem-solving, time management, and communication skills through daily operations.
- With this job I couldn't get any programming skills but learned a lot of soft skills (thanks to my teachers).

PROJECTS

FinBot AI — AI-Powered Personal Finance Manager (Telegram Bot)

- Multi-language finance tracker with voice input, AI expense categorization, and PDF/CSV exports.
- **Tech Stack:** Node.js, Telegraf.js, Prisma, PostgreSQL, and Google Speech-to-Text API.
- **Source code:** Github Repository • **Live Demo:** Fin bot

Cyber Sentinel — Cyber Threat Intelligence Platform

- GraphQL API with OAuth/JWT; aggregated threat data from OSINT feeds.
- Integrated Google Safe Browsing, VirusTotal, PhishTank.
- Built on Node.js, Express, GraphQL, MongoDB/PostgreSQL.
- **Source code:** Github Repository • **Live Demo:** Cyber threat

SaaS-Admin-Dashboard — Full-Stack Task Management App

- Real-time admin dashboard for team and personal task management.
- **Tech Stack:** NestJS backend, MongoDB (Mongoose), React frontend with TailwindCSS; implemented role-based permissions and authentication.
- **Source code:** GitHub Repository • **Live Demo:** Saas dashboard

Portfolio website with AI chat bot

- Integrated AI-powered chatbot for interactive visitor engagement and chat bot responses as my assistant based on my projects and experience that I gave.
- Built with a modern frontend stack and hosted for public access using Digital Ocean.
- **Tech Stack:** React, TailwindCSS, Node.js.
- **Source Code:** Backend and Frontend • **Live Demo:** Portfolio website

EDUCATION

Bachelor's in Computer Science (in progress) — Tashkent University of Information Technologies (TATU) (correspondence education/sirtqi ta'lim/заочное образование)

Expected Graduation: 2027

LANGUAGES

- Uzbek — Native
- English — IELTS 6.5 — B2 (Fluent)
- Russian — B1(Conversational)
